

Number of banks with securities gains of more than 20% of revenues marginally increased in Q4'13

As of Feb. 25, 2014.

Based on regulatory data filed by commercial banks, savings banks and savings institutions.

Revenue percentage is based on quarterly results. Number of banks and thrifts is the count of companies with securities gains-to-operating revenue of 20% or more at the end of the quarter.

Total revenue is the sum of net interest income before provision expense, noninterest income and gains on securities.
